

Carpet Protector

Teflon Type Carpet Protectant Concentrate

Carpet protector contains a Teflon type fluoropolymer, which penetrates the carpet fibers with its stain resisting, soil retarding properties. This product allows the treated carpet to repel soil and stains. Use of this product results in cleaner carpets and prolonged carpet life due to reduced carpet abrasion, enhancing the overall beauty of your carpets. So give your carpets the built-in protection of mill treated carpets while bolstering the protection of previously mill treated carpets.

FEATURES

- *Provides protection against stains
- * Makes vacuuming faster and more efficient
- * Water-based
- *Acid-Free
- *Caustic-Free
- *Non-Toxic
- *Non-Flammable

APPLICATIONS

- * Carpets & Upholstery
