

Concrete Cleaner

Concrete Cleaner is a 100% active, gold colored blend of powdered cleaning agents that will quickly and easily remove dirt, grease and oil stains from all concrete surfaces. Floors may be cleaned by simply sprinkling the powder on the wetted surface, allowing to stand a few minutes, brushing with a broom or deck brush, and flushing clean. A fluorescent opal dye has been added to insure that the application is even. It has a pine odor and is pine powered to deep clean the area and leave a lingering fresh smell. This product can be used in cleaning concrete surfaces in industrial plants, garages, new and used car lots, parking areas, driveways and sidewalks. Low initial price makes this labor saver a necessary addition to programs that include concrete floor maintenance.

FEATURES

- *Cost effective
- *Solvent-Free
- *Non-Acid

APPLICATIONS

- * Floor cleaner
