

Endure

BACTERIA BASED BIOLOGICAL WASTE DEGRADER

Introducing ENDURE, a revolutionary approach to grease waste elimination. This microbiological breakthrough allows the natural ability of the bacteria/enzymes to digest and degrade waste, even in the presence of bleach, quaternary disinfectants, chlorinated dishwasher, and alkaline cleaners, which inhibit the performance of most products on the market. This outstanding product has the remarkable ability to withstand intermittent high temperatures (up to 180°) and the high alkalinity from cleaning products. ENDURE utilizes the natural ability of unique bacterial strains to degrade the solid waste that accumulates in grease traps and drains.

FEATURES

- *Heat Resistant
- *Bleach Resistant
- *Alkali Resistant
- *Disinfectant Resistant
- *Reduces Suspended Solids
- *Reduces Sludge Volume
- *Reduces BOD
- *Rapid Bacteria Replication

APPLICATIONS

- *Grease Traps / Drain Lines
- *Waste Treatment Facilities
- *Septic Tanks
- *Marine Holding Tanks
- *Lift Stations

TECHNICAL DATA

Dilution.....	Ready to use
DOT.....	Not regulated
Odor.....	Cherry
pH.....	8.5 -9.0
Physical appearance.....	White milky liquid
Pound/gallon.....	8.4
